The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/527,795	<b>Applicant(s)</b> LEE ET AL.	
	<b>Examiner</b> Bernard Lipman	<b>Art Unit</b> 1796	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 14 October 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. Applicant's election without traverse of Group I, now claims 1-8 in the reply filed on 14 October 2008 is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Okochi et al, U. S. Patent Application Publication 2003/0017331 or EP 1,262,534 or Gruber et al, U. S. Patent 4,491,646.

All three references teach adhesive compositions comprising the required acrylic polymer with the specific two monomers as required and with the proportions as required, in combination with the specific isocyanate compounds also in the claimed proportions. The specific crosslinking density is not mentioned although gel fraction, a similar property, is taught. Furthermore, using the same polymers with the same amount of reactive monomers, crosslinked with the same amount of the identical crosslinking agent would reasonably be presumed to possess the same crosslinking density. Fitzgerald Et Al, 205 USPQ 594. Although the proportions of monomers taught in the references and the amounts of isocyanate are not the identical ranges, the ranges taught substantially overlap, and would be at least prima facie obvious to one of ordinary skill in the art. The requirement for use "for an electro-magnetic shielding film" has been considered, but is viewed as a mere intended use or as an inherent possible use since the compositions are taught to form films and are made from the same components. The claims are, therefore, properly rejected over the cited references.

The other references cited are also acrylic type polymer compositions with the same hydroxy functionality on the polymer, and with the required isocyanate crosslinking agents.
